PROFESSIONAL SUMMARY

Software Engineering graduate with **First Class Honours** (BEng (Hons), University of Westminster) and over two years of professional experience at Dimensions IT (Pvt) Ltd, contributing to the development and maintenance of complex client-facing web solutions. Strong foundation in **Java and Spring Boot** backend development, RESTful API development and both relational and NoSQL databases, with hands-on experience in machine learning and computer vision. Seeking an **Associate Software Engineer** or **Software Engineer** role contributing to backend and full-stack development of scalable production systems.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: Spring Boot, Spring Security, React, Node.js, Fast API, Java Swing, Tailwind CSS

Backend: RESTful API Development, Microservices Fundamentals, JWT Authentication, Spring Boot Actuator, Apache Kafka

Databases: MySQL, MongoDB, PostgreSQL (Supabase), Liquibase

DevOps & Tools: Docker, Git, GitHub, Maven, Linux CLI, Agile / Scrum

ML & CV: YOLOv11m, Convolutional Neural Networks, Random Forest, OpenCV

IoT & Embedded Systems: ESP32-S3, IoT Sensor Integration, Arduino IDE

Testing & Practices: JUnit, Integration Testing, Manual Testing, Regression Testing, Postman, SEO optimisation

PROFESSIONAL EXPERIENCE

Dimensions IT (Pvt) Ltd

May 2024 - Jun 2025

Software Engineering Intern

- Contributed to the development and maintenance of approximately 6+ client-facing web projects, including e-commerce platforms, campaign microsites, responsive corporate websites, and custom web applications for UK-based clients.
 - Built and maintained Java and Spring Boot backend functionality across 3+ client projects, supporting RESTful API endpoints, feature enhancements, bug fixes, and front-end integrations.
 - Improved search engine visibility for client websites through SEO best practices, including meta tag optimisation, semantic HTML structuring and page performance tuning.
 - Performed manual functional and regression testing across 10+ application releases, documenting defects, verifying fixes, and supporting production-ready deployments within an Agile team.
-

EDUCATION

Informatics Institute of Technology (IIT) affiliated with the University of Westminster

Sep 2022 - Nov 2026

BEng (Hons) Software Engineering - **First Class Honours**

Key modules: OOP, Concurrent Programming, Database Systems, Algorithms, Server-side Web Development, Cybersecurity, Operational Research.

Kegalu Vidyalaya

2019-2022

GCE Advanced Level - Mathematics Stream

Royal International School

2018

GCE Ordinary Level

KEY PROJECTS

StockPilot – Inventory and Order Management System · Java · Spring Boot · Spring Security · JWT · Apache Kafka · Liquibase · MySQL · React · RESTful APIs · Spring Boot Actuator · Spring Data JPA · Hibernate · Maven · JUnit

Full-stack inventory and order management platform for managing products, categories, customers, orders, and stock quantities. Uses Spring Boot RESTful APIs, React, and MySQL for core business operations, with JWT-based authentication and role-based authorization through Spring Security. Includes Liquibase database schema migrations, Apache Kafka event-driven communication, automated stock deduction, low-stock monitoring, order-status workflows, and Spring Boot Actuator health monitoring. ([Link](#))

DairyFusion AI – Multimodal Yoghurt Cup Defect Detection System · Python · YOLOv11m · Custom CNN · Random Forest · OpenCV · FastAPI · React · ESP32-S3 · IoT
[Final Year Thesis] [AI / Computer Vision]

End-to-end multimodal quality inspection system combining YOLOv11m object detection, a custom CNN, Random Forest classification, OpenCV, and ESP32-S3 IoT sensor data. The YOLOv11m object detector achieved approximately **80%** detection accuracy across 12 yoghurt defect classes. Includes a React and FastAPI application with fault-tolerant fallback mechanisms and the **first public yoghurt cup defect dataset** containing 462 annotated real-factory images. ([Link](#))

Thread-Safe Patient Management System (A&E Simulation) · Java · Concurrent Programming

Multi-threaded A&E patient management simulation in Java with continuous patient arrivals, automated day/night shift rotation, and speciality-based consultant matching. Used thread-safe blocking queues and synchronised statistics to prevent data corruption under high-load conditions. ([Link](#))

GestureSway - Hand Gesture Snake Game · Python · React · Node.js · MongoDB

Web application featuring a snake game controlled through real-time hand gesture recognition using machine learning. Supports users with limited hand mobility through accessible gesture-based interaction. Built with React, Node.js, MongoDB, and a Python-based machine-learning component. ([Link](#))

Web-Based Student Database Management System · Java · React · Spring Boot · MySQL · JavaScript · RESTful APIs

Full-stack CRUD application for managing student records through a responsive web interface. Uses Java and Spring Boot for RESTful API development, React for the frontend, and MySQL for relational data storage. Supports creating, viewing, updating, and deleting student information. ([Link](#))

Wayamba Ply Industries - Manufacturing Website · HTML · CSS · JavaScript · Tailwind CSS
[Freelance project]

Responsive single-page website for a plywood manufacturer in Sri Lanka. Includes product showcases, certification reports, interactive FAQs, and Google Maps integration with mobile-friendly layouts and on-page SEO optimisation. ([Link](#))

ACHIEVEMENTS & EXTRACURRICULARS

- Tech Triathlon Designation Challenge – Hackathon organised by Rootcode Labs
- Member, IEEE Club & IEEE Computer Society - IIT
- Member, Rotaract Club of IIT
- Senior Prefect - Royal International School Kegalle
